

Consumer Price Index in the Month of Farvardin of the Year 1400¹

Increase in National Point-to-Point Inflation Rate

Point-to-point inflation rate refers to the percentage change in the price index in comparison with the corresponding month in the previous year. The point-to-point inflation rate in the month of Farvardin² of the year 1400 stood at 49.5 percent, that is to say, that the national households spent, on average, 49.5 percent higher than the month of Farvardin of the year 1399 for purchasing “the same goods and services”.

Moreover, in this month, the point-to-point inflation rate experienced a 0.8 percentage point increase in comparison with the previous month (Esfand, the year 1399). The point-to-point inflation rate for the major groups of "food, beverages and tobacco" and "non-food items and services" were 63.1 percent (with a 3.5 percentage point decrease) and 43.0 percent (with a 2.5 percentage point increase), respectively.

This is while the point-to-point inflation rate for urban households stood at 48.8 percent, which increased by 1.0 percentage point in comparison with the previous month. Moreover, this rate was 53.0 percent for rural households which decreased by 0.3 percentage points in comparison with the previous month.

Increase in the Monthly National Households Inflation Rate

The monthly inflation rate refers to the percentage change in the price index in comparison with the previous month. The monthly inflation rate in the month of Farvardin of the year 1400 stood at 2.7 percent, which increased by 0.9 percentage points in comparison with the previous month (Esfand, the year 1399). The monthly inflation rate for the major groups of "food, beverages and tobacco" and "non-food items and services" were 2.9 and 2.6 percent, respectively.

¹It is the Iranian year which usually begins on the day of 21 March of Gregorian calendar. To find the corresponding year of Gregorian calendar, add 621 or 622 (depending on the time of the year) to a [solar Hijri](#) year. For example, the corresponding year of the year 1400 in Gregorian calendar is (21 March 2021-20 March 2022).

2 Iranian months and their equivalent in Gregorian calendar

Farvardin (21 March-20 April)

Ordibehesht (21 April-21 May)

Khordad (22 May-21 June)

Tir (22 June-22 July)

Mordad (23 July-22 August)

Shahrivar (23 August-22 September)

Mehr (23 September-22 October)

Aban (23 October-21 November)

Azar (22 November-21 December)

Dey (22 December-20 January)

Bahman (21 January-19 February)

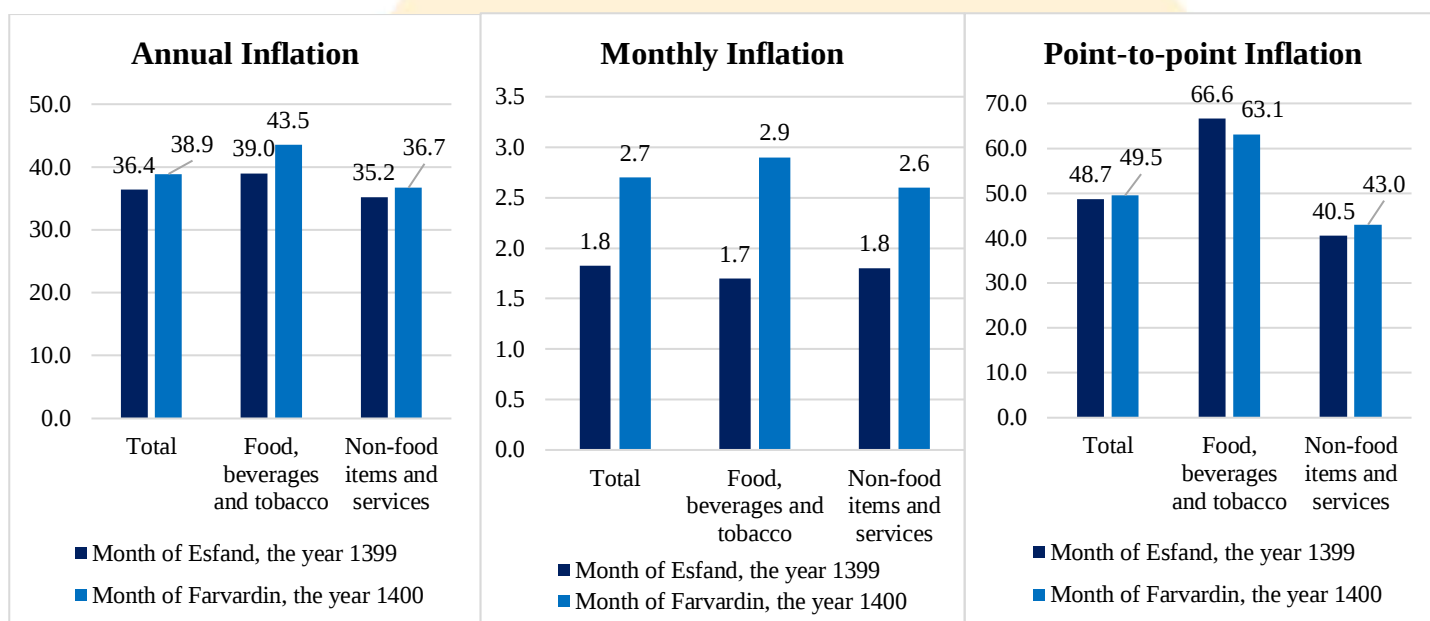

Esfand (20 February-20 March)

This is while the monthly inflation rate for urban households is 2.6 percent, which increased by 0.8 percentage points in comparison with the previous month (Esfand, the year 1399). This rate was 3.0 percent for rural households which increased by 1.4 percentage points in comparison with the previous month.

Increase in the Annual National Households Inflation Rate

The annual inflation rate refers to the average percentage change in the price index in a year ending the current month in comparison with the same period in the previous year. The annual national household inflation rate for the month of Farvardin in the year 1400 stood at 38.9 percent, which increased by 2.5 percentage points in comparison with the previous month (Esfand, the year 1399).

Moreover, the annual inflation rate for urban and rural households is 38.6 and 40.6 percent respectively, which has increased by 2.4 and 2.9 percentage points for urban and rural households, respectively in comparison with the previous month.

Prices Changes in the Current Month

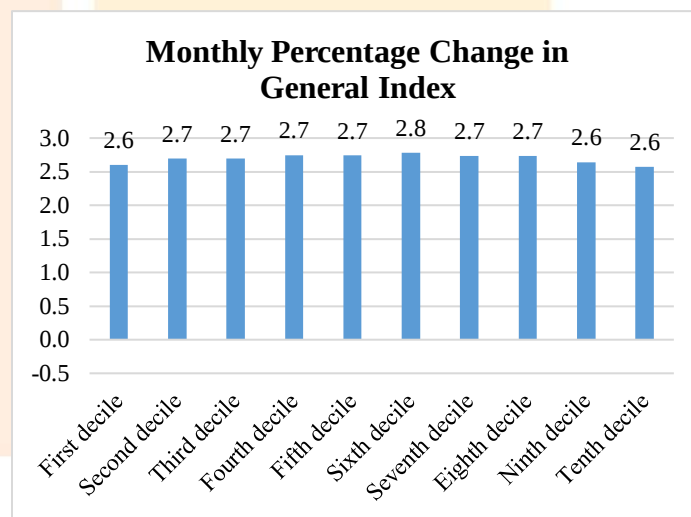

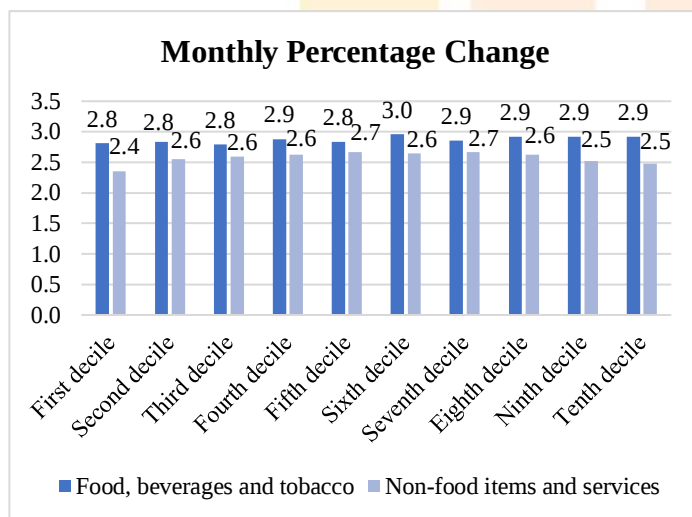

In the main group of "food, beverages and tobacco", the highest increase in the price compared with the previous month was for "vegetables" group (lettus, tomatoes and celery), "meat, white meat and related products" group (lamb meat, beef, veal and chicken meat), and "beverages" group (mineral water, carrot juice and fruit juice). In the main group of "non-food items and services", the highest increase in prices went to "miscellaneous goods and services" group (car insurance premium), "Services for the maintenance and repair of the dwelling" group (plastering and brickwork), "restaurants and hotels" group (hotel accommodation expenses) group, (the hire of banquet hall), compared with the previous month.

Also, "vegetables" group (vegetable for stew, leafy vegetable eaten with meal, spinach) experienced a decrease in price compared with the previous month.

Price Index Percentage Change in the National Expenditure Deciles in the Current Month

The range of an annual inflation rate in the month of Farvardin of the year 1400 for various expenditure deciles was fluctuating between 37.5 percent for the first decile (those with the lowest income) and 45.8 percent for the tenth decile (those with the highest income).

Graphs of the index percentage change for various expenditure deciles in general index and in the major groups of "food, beverages and tobacco" and "non-food items and services" compared with the previous month are shown as follows:
