

### *Introduction*

Budget statistics came to existence as the Ministry of Finance undertook formulation of the government budget in 1289. The produced statistics drew on the organizations revenues and expenditures data until 1342.

In 1342, the responsibility was shifted to the then Planning Organization (present Vice Presidency for Strategic Planning and Supervision). Now, along with formulating the Government public budget, the Management and Planning Organization provides for the budget of public corporations and banks, as well as the government affiliated for-profit enterprises which were transferred to the public sector after the Islamic Revolution.

The statistical information provided here are from budget laws of different years and include various receipts and disbursements of the government public budget, the actual credits of Ostans, summary of the government corporations, government affiliated for-profit enterprises and banks budgets.

#### *Definitions and concepts*

**Government total budget:** the government's financial programme for a fiscal year, which corresponds with the Iranian calendar year. It contains the government public budget as well as

budgets for banks, government corporations, and government affiliated for-profit enterprises.

**Government public budget:** the budget in which financial resources required to carry out the annual programme as well as current and development credits for government agencies are formulated and predicted.

**Approved and realized budget:** the budget for each fiscal year is estimated and proposed to the Cabinet in the previous year by Vice Presidency for Planning and Supervision and is offered to the Majlis for approval as the budget bill. The bill is then communicated to the government as the budget law by the beginning of the new year (primary approved figures or estimate). With regard to possible changes in economic, social, and political conditions and fluctuations in receipts and payments, another budget for departments and organizations is offered to the Majlis by the government as the supplementary bill, which should be approved by the end of the year (amended approved figures). At the end of every fiscal year, the government's actual and realized budget becomes clear with regard to the amount of actual receipts and the sum of payments by the Treasury.

**Payments of the government public budget:** all development and current expenditures paid by

the government from general and special revenues during a fiscal year.

**Receipts of the government public budget:** all sums known as public and special revenues as well as miscellaneous sources of credits, and funds that legally should be accumulated in the Treasury General's accounts.

**General revenues:** refers to revenues from incomes of ministries, government institutions, tax and dividends for government monopolies and properties, other revenues that are included in the total state budget law.

**Special revenues:** refers to revenues legally allotted to special expenditure(s) in the total state budget law.

**Miscellaneous sources of credits:** sources considered in the government public budget under the titles of loans, issuing government bonds, returns from previous years payments, and similar titles, and not of the nature of income.

**Credit:** a sum approved by Majlis for special Expenditures to achieve certain goals of government's programmes.

**Provision-of-capital-assets (development) credits:** refers to the credit allocated to specific operations and services which are carried out based on technical, social and economic studies by government organization. These operations and services are conducted during a specific period of time with a specific budget to realize the goals of the 5-Year Development Plan as a fixed investment or conduct a study to create capital asset. The needed resources for conducting these operations and services are funded through ownership of capital asset. This credit is divided into two types: profit and non profit.

**Current credits:** credits considered in the five-Year Development Plan as a whole and in the government public budget in parts to meet government current expenditures as well as expenditures of maintaining the level of government's socio-economic activities.

**Prepayment:** a payment satisfied before undertaking fulfillment, out of the concerned credits, based on the ordinances and agreements and according to the regulations.

**Tax:** includes all obligatory and non reimbursable payments by legal and natural entities to the government which are spent according to the law for governance and public expenses.

**Project:** a correlated and specified set of operations and services carried out in a certain period and at a certain cost for achieving a particular goal.

**National projects:** strategic, high-technology and extensive projects with supraregional benefits.

**Ostani (provincial) projects:** projects planned in Ostans and implemented using both local and national facilities.

#### **Selected information**

National budget resources for the year 1389 were predicted to form an amount of 3685 thousand billion rials, indicating a rise of 32 percent.

Government revenues and cession of government capital and financial assets were about 1271 thousand billion rials in 1389, indicating a rise of 31 percent in comparison to the previous year.

In 1389, cession of capital assets with 36%, tax revenues with 27.9%, cession of financial assets with 19.7% and revenues from government ownership with 8.2% account for the highest share of government revenues respectively.

Actual expenditure (current) credits for government agencies in Ostans in 1388 were 34.2 thousand billion rials with a rise of 32 percent compared to the previous year. Moreover, Ostans' actual provision-of-capital-assets (development) credits were about 75.6 thousand billion rials in 1387 showing a rise of 18.7 percent in comparison to the previous year.

1. The difference of 122000 billion rials between the total and sum of parts is due to the figure for transparency in the price of energy bearers.

2. The difference of 122000 billion rials between the total and sum of parts is due to the figure for transparency in the price (subsidy) of energy bearers.

3. The difference of 85000 billion rials between the total and sum of parts is due to the cut of allocation while implementing budget.
