Weights and Measures

billion	1000 million (1 milliard)
1 kilometre [km]	1000 m
1 ha	10000 m ²
1 sq km [km²]	1000000 m ² – 100 ha
1 litre [lit]	0.001 m ³
1 barrel (US)	0.16 m ³ – 158.98 lit
m ³	6.29 barrels (US)
ton	1000 kg
megawatt hour	1000 kWh

Where figures are rounded, discrepancies may occur between sums of the components and the total. All ratios and indexes were calculated before rounding.

Iranian year begins on March 21st of the Christian year and ends on March 20th of the next year. To convert the Iranian year into Christian year, add 621 to the former.

IN THE NAME OF ALLAH THE COMPASSIONATE, THE MERCIFUL

Preface

The Statistical Yearbook of Iran contains the latest statistical information available on economic, social and cultural areas of the country to meet the statistical data needs of the local decision makers, planners and researchers, as well as all other interested users. The Yearbook was first officially compiled in the year 1345 and has been released regularly.

The major sources of the Yearbook include: (a) the results of censuses and sample surveys conducted by the SCI, (b) the results of surveys conducted by other organizations, and (c) administrative data. Since population censuses are taken every 5 years and also some other censuses and surveys conducted by the SCI or other organizations are not taken at regular intervals, some of the Yearbook's statistical items are not represented by a complete range of data.

In order to make timely provision of important statistical information to meet the needs of users and minimize their references to various organizations producing statistics, the SCI has attempted to have timely release of different statistical publications including the Statistical Yearbook, and also developed the Statistical Information Database.

The SCI Publication Database, a part of the SCI Statistical Information Database, which contains 4780 titles, is accessible on our website, www.amar.org.ir as of 1381. The Database is continuously updated and enjoys the capability of advanced search which provides swift and easy access to the existing information.

In addition to the cited database, the information on the Statistical Yearbook is also accessible at http://salnameh.sci.org.ir with various capabilities as of 1387.

The 1390 Statistical Yearbook of Iran is published in both Persian and English. The bilingual CD-ROM version is also available. In addition, the statistical yearbooks of 30 Ostans (provinces) are released by Deputies for Planning of Offices of Governor Generals nationwide (the former local branches of the Management and Planning Organization) with similar format under supervision of the SCI.

Before going through the chapters, users are recommended to study the introductions which take in the definitions and concepts concerned and the subject-matter coverage of the statistical items. Further, they provide readers with justifications for unavailability of some timely data or exclusion of some statistical items.

It is noteworthy that the beginning of the yearbook includes selected information of all chapters which has been added to the introduction of the related chapter, too. In order to have a general view on all information presented in the Yearbook, its reading is recommended.

Particular thanks and appreciation are extended to all *Deputies for planning offices*, and *Director-Generals of Statistics and Information offices* of the ministries, organizations and the Islamic Revolution institutions, as well as all their colleagues who helped us in this great job. Their generous and valuable assistance contributed a lot to preparation of the Yearbook. We hope to enjoy their cooperation and contribution continuously for enhancing the yearbook quantitatively and qualitatively.

Thanks to all staff of the Statistical Centre of Iran who contributed to the preparation and production of this publication.

Adel Azar Head, Statistical Centre of Iran

Selected information

ran comprises a land area of over 1.6 million square kilometers. It lies on the southern half of the northern temperate zone, between latitudes 25° 00' and 39° 47' north, and longitudes 44° 02' and 63° 20' east. The land's average height is over 1200 meters. The lowest place, located in Chaleh-ye-Loot is only 56 meters high, while the highest point, Damavand peak in Alborz Mountains, rises as high as 5610 meters. The land height at the southern coastal strip of the Caspian Sea is 28 meters lower than the open seas.

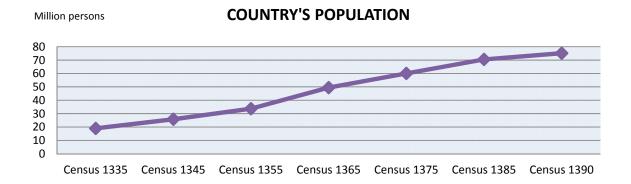

Iran is bounded by Turkmenistan, Caspian Sea, Azerbaijan, and Armenia on the north, Afghanistan and Pakistan on the east, Oman Sea and Persian Gulf on the south, and Iraq and Turkey on the west.

In the year 1390, I.R. Iran was divided into 31 Ostans (provinces), 400 Shahrestans (sub-provinces), 994 Bakhshes (counties), 1166 Shahrs (cities) and 2507 Dehestans (rural agglomerations).

On the basis of the Population and Housing Census taken in Aban 1390, the total population of the country was 75149669 persons (comprising 50.4% male & 49.6% female); comparing to the result of the 1385 Census, the average annual population growth was 1.3%.

In the 1390 Census, there were 21.2 million households out of whom 72.82% were settled in urban areas and the rest (27.12%) was settled in the rural areas. In the mentioned year, the mean age for men and women was 29.8.

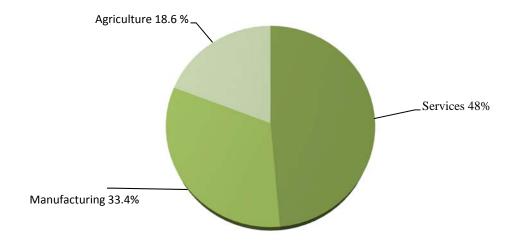

During the year 1390, over 1.4 million births were registered out of which 48.7 percent were female. Moreover, about 875,000 marriages and 142,800 divorces were recorded over the year 1390, showing a decrease of 1.9% and an increase of 4.1% respectively in comparison with the preceding year.

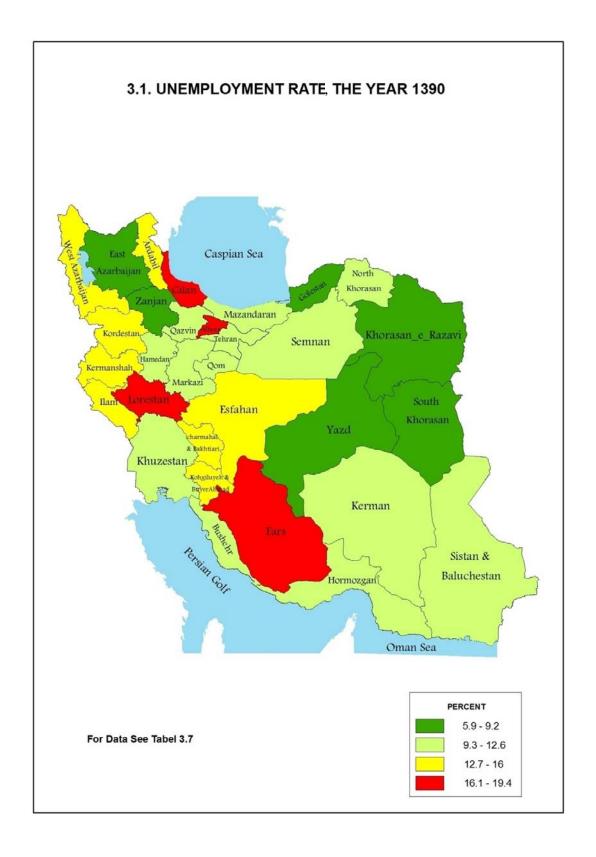

In the year 1390, 36.9% of population aged 10 and over were considered economically active, with an unemployment rate 12.3%. Unemployment rates for male, female, in urban and rural areas were 10.5, 20.9, 13.7, and 8.9 percent respectively.

Amongst Ostans of the country, Alborz, Lorestan, and Fars with 19.3, 19.2 and 18.5 percent had the highest unemployment rate and Yazd, South-Khorasan, and Zanjan with 6.7, 8.4 and 8.4 percent had the lowest unemployment rate of the country respectively.

RELATIVE DISTRIBUTION OF EMPLOYED POPULATION AGED 10 AND OVER BY THREE MAJOR ECONOMIC ACTIVITIES, 1390

During the academic year 1390-1391, about 5 million and 720 thousand persons were studying in primary schools, 3 million and 228 thousand persons were in lower secondary schools, 2 million and 957 thousand persons were in upper secondary schools and 441 thousand persons were attending pre-university level, compared to the previous year, the primary and pre-university courses increased by 1.22 and 1.27% percent and the lower secondary and upper secondary levels experienced a decline of 0.51% and 2.68% respectively.

Total number of university students over the academic year 1390-1391 was about 4 million and 459 thousand persons, indicating an increase of 8.3% compared to the previous year. Share of the Islamic Azad University students out of the total number of university students was 36.6 percent. Out of the total number of the students, 23.1% were studying for associate degree, 65.5% for bachelor's degree, 9.1% for master's degree and 2.3% for professional doctorate and PhD.

Total number of university graduates during the academic year 1389-1390 was 627,000 persons.

GRADUATES BY BROAD FIELD OF STUDY: ACADEMIC YEAR 1389-90

In the year 1390, over 32,000 physicians were employed in the Ministry of Health and Medical Education. Out of the cited number, 14901, 3625, and 1731 persons were general practitioners, dentists, and pharmacists respectively. Also over 215,000 paramedics were working.

In the year 1390, about 104,000 beds were in use in 805 medical establishments (hospitals, maternity hospitals and sanatorium) of the country. It should be noted that 62.5 percent of the above mentioned establishments are affiliated to the Ministry of Health and Medical Education.

DISTRIBUTION OF MEDICAL ESTABLISHMENTS BY LEGAL

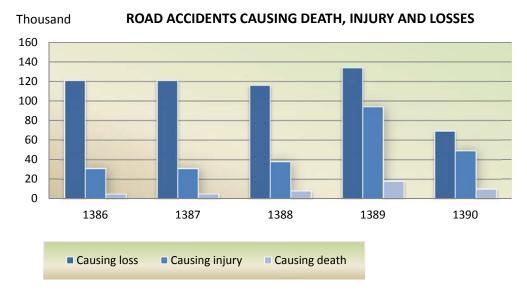

Also in the same year, 10800 health care and medical centres (clinic, poly clinic and health centres) were operating in the country, which decreased by 2 percent in comparison with the preceding year. In the mentioned year, there were 4850 medical diagnosis laboratories, 4522 rehabilitation centres, 2605 radiology centres and 8484 pharmacies in the country.

In the year 1390, about 3 million and 462 thousand cases in general courts and about 600 thousand cases in appeal courts were settled nationwide.

Moreover, during the year 1390, about 431,000 robberies were registered by the Police Department of the I.R of Iran, which shows a 4.3 percent decrease in comparison with the preceding year.

In the year 1390, the percentage of the inter-city car accidents with a 49.6 % decrease reached about 127000 cases, out of which 7.5% of accidents resulted in death, 38.5% in injury and 54% in losses. Also in the same year, the number of the intra-city car accidents with 49 % decrease, in comparison with the previous year, reached 270,000 cases, out of which 1.5% resulted in death, 56.1% in injury, and 42.4% in losses.

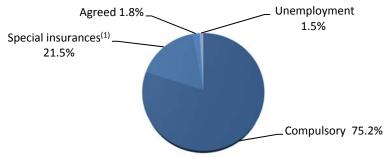

According to the results of the 1390 Population and Housing Census, about one million and 18 thousand persons have at least one type of disability, of whom 62.6% accounted for male. It should be mentioned that about 81 percent of the disabled persons have one type of disability only.

At the end of the year 1390, the number of establishments covered by Social Security Organization was about one million and 236 thousand. At the end of the year 1390, the principal insured persons covered by the mentioned Organization increased to 11 million and 497 thousand persons, showing a rise of 8.7% compared to the year 1389.

In the year 1390, beneficiaries (principals and dependants) of medical services covered by Medical Services Insurance Organization were about 36million persons, of whom 17.7%, 10.8%, 66.1% and 5.4% enjoyed government employees insurance, Iranian insurance, villagers insurance and the insurance of other groups respectively.

THE PRINCIPAL INSURED PERSONS COVERED BY THE SOCIAL SECURITY ORGANIZATION BY TYPE OF INSURANCE AT THE END OF THE YEAR 1390

1) Including insured persons in own account occupations, weavers, drivers and voluntary.

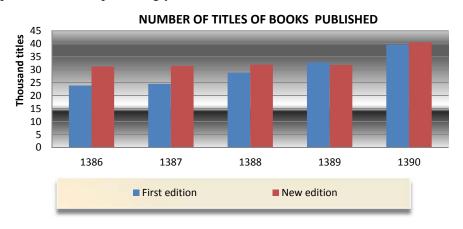

In the year 1390, programs produced by national and international radio channels of the I.R.I B were about 240000 hours which increased by 4.3% compared to the previous year. Also in the same year, the national and international TV channels of the I.R.I. B produced about 98000 hours of programs, showing an increase of 15.3 percent in comparison with the preceding year.

During the same period, the number of titles of the press and periodicals published in Tehran and other cities of the country was 2640 and 2259 indicating a rise of 18.9% and 26.3% respectively in comparison with the preceding year. Moreover, 196 titles of the said press and periodicals were published daily while 716 titles were published weekly.

Over the same period, more than 61000 titles of books with a circulation of about 173 million copies, authorized by the Ministry of Culture and Islamic Guidance, were printed and published, which decreased 4.4% and 12.9% respectively compared to the previous year.

Attendances at museums and historical monuments, managed by Cultural Heritage and Tourism Organization, during the year 1390 were more than 22 million persons, which show a decline of 18.5 percent compared to the previous year.

Furthermore, in the year 1390, the number of foreign tourists arrived in the country was more than 3 million and three hundred thousand persons, indicating an increase of 5.5 percent in comparison with the preceding year.

According to the results of the 1382 General Agricultural Census, a number of 4,332,000 agricultural producing units have been recognized as agricultural holdings.

In Mehr 1382, the area of the agricultural lands of the country was 17.7 million hectares including lands under annual crops, fallow, orchard and nursery. The area of the lands under annual crops,

fallow and orchard and nursery is reported 11.6, 4.6 and 1.5 million hectares respectively. Also, the area of land under irrigated crops was over 8.3 million hectares.

On the basis of the results of the said census, during the crop year 1381-82, area under cultivation and production of main agricultural crops was as follows:

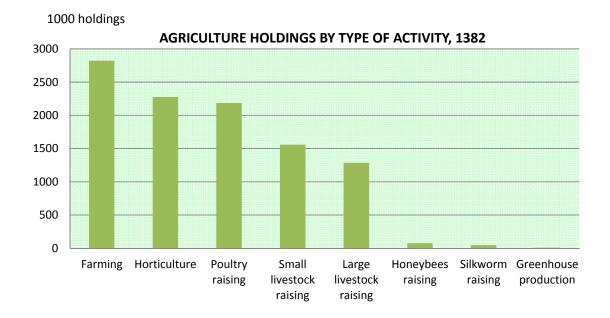

Wheat: area under cultivation, 6,900,000 hectares, production 11.7 million tons, yields in the irrigated wheat, 3.1 tons per hectare and non-irrigated wheat, more than 0.9 tons per hectare.

Rice: area under cultivation, 465,000 hectares, production 1.82 million tons, yields in hectare, more than 3.9 tons.

Production of the orchard crops: 1.15 million tons apples, 1.3 million tons citrus fruits, 1.4 million tons grape and more than 0.5 and 0.3 million tons date and pistachio respectively.

At the time of census (Mehr and Aban 1382) all livestock of the country consisted of 37 million sheep, 20 million goats, 6 million cows, 159,000 buffalos and 139,000 camels.

The area of the forests of the country was estimated 14.3 million hectares in 1389.

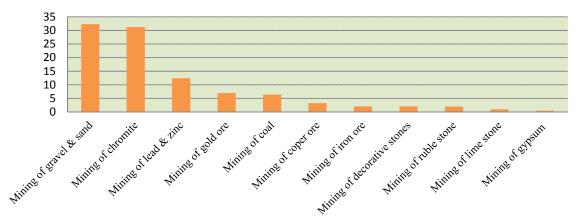

In the year 1389, there were 4974 operating mines in the country with a total of 81293 workers which shows an increase of 5.8 percent compared to the previous year.

In the same year, the value of the mines' production amounted to 50148 billion rials. Amongst different activities, iron ore, copper ore, and decorative stones, with 17321, 13401, and 5345 billion rials value respectively had the highest annual production values.

In the year 1389, the value added of the activities of the operating mines amounted to 38737 billion rials out of which the highest amount was that of iron ore, copper ore, and decorative stone, with 12016, 11639, and 4610 billion rials respectively. The total of the value added obtained from these mines comprises about 73% of the total value added of this sector.

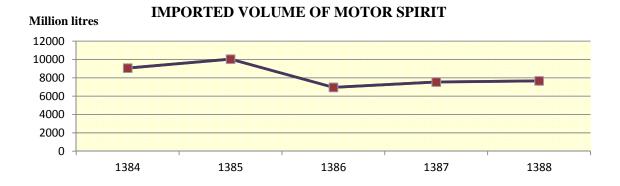

In the year 1388, a total of 750537 thousand barrels of crude oil were exported, which shows a 13.3% decrease compared to the preceding year. Also in the same year, the amount of oil products exports was 17 million liters per day due to a 6.3% rise compared to the preceding year.

Furthermore, in the same year, the production of some oil products in the total national refineries by cubic meter per day was: liquefied gas: 8362, motor spirit 59515, burning oil: 18519, and oil gas: 88702 which changed 3.6, 15.6, -13.2 and 4.4 percent compared to the preceding year.

In the year 1388, oil gas with the annual consumption of 33817 thousand cubic meters had the maximum share of consumption among all kinds of oil products and motor spirit with the annual consumption of 23652 thousand cubic meters was at the second rank.

Over the same year, out of 1105 cities of the country, 792 cities were supplied with piped gas and 57 cities were being supplied with piped gas, which shows that 72% of the country's cities are supplied with the piped gas. The total production of the National Company of the Petrochemical Industries with a 14.6% increase compared to the preceding year reached 34433 thousand tons in 1388.

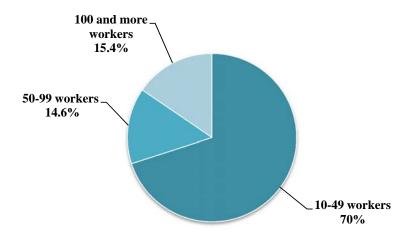

In the year 1389, there were 15302 manufacturing establishments with 10 and more workers having 1249721 employees, which declined by 5 and 0.2 percent respectively compared to the preceding year. About 98 percent of the mentioned establishments are owned by private sectors and 2 percent by public sector. Besides, from among the said number of workers, 19.6 percent were employed in the establishments with 10-49 workers, 12 percent in the establishments with 50-99 workers and 68.4 percent were employees of the establishments with 100 and more workers.

In the same year, the value-added of the activity of manufacturing establishments with 10 and more workers has been over 496071 billion rials which represents a 12.3% increase compared to the preceding year.

In the year 1389, more than 1527 thousand tons of vegetable oil, 1846 thousand tons of sugar and hard sugar, 57181 thousand tons of cement, 486 thousand tons of various types of paper as well as 1427539 sets of passenger cars and jeeps were produced in the manufacturing establishments.

DISTRIBUTION OF NATIONAL MANUFACTURING ESTABLISHMENTSWITH 10 AND MORE WORKERS BY SIZE, THE YEAR 1390

In aquatic year 1389-90, the amount of annual discharge of the underground water resources was 70482 million cubic meters which decreased 6.5% in comparison with the aquatic year 1388-89. In the year 1390, the inflow of the large reservoir dams was 33740 million cubic meters, with a 5.3% decrease in comparison with the previous year. In this year, 25675 million cubic meters of large reservoir dams water have been consumed, 63 percent of which belongs to the agricultural consumptions.

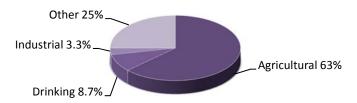

In the year 1390, there were more than 17140000 water extensions, which had a 3.4 percent increase in comparison with the preceding year. Out of this number about 12886000 extensions were for urban areas which had a 4.6% increase compared to the previous year.

In the same year, the gross electricity generation of institutions affiliated to the Ministry of Energy was 208413 million kilowatt-hours, more than 44 percent of which was produced in the steam power plants. Furthermore, the gross electricity generation had a 1.9 percent increase compared to the preceding year.

In the year 1390, percentage of electricity subscribers in house, public, agricultural and manufacturing sectors was 81.8 %, 4%, 1.0%, and 0.6 % respectively. Also in this year, the percentage of the electricity sold and consumed in house, manufacturing, agricultural, public sectors and for the streets lighting was 30.1%, 34.8%, 16.3%, 9.1%, and 2% respectively.

At the end of 1390, a number of 54116 villages (about 4.3 million rural households) were electrified which increased by 1.2% in comparison with the previous year.

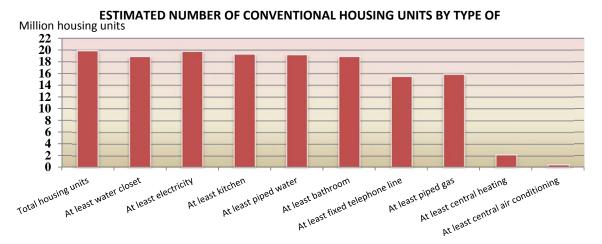

WATER CONSUMPTION OF LARGE RESERVOIR DAMS BY TYPE OF USE, THE YEAR 1390

In the year 1390, about 213 thousand construction permits with 113700 thousand square meters floor area were issued by municipalities which increased by 1.7 and 22 percent respectively in comparison with the preceding year. It is noteworthy that about 90 percent of the permits issued were related to the housing units.

In the year 1390, the value of investments made in urban areas by privet sector for the newly started, semi-finished and completed buildings was about 403367 billion rials which increased by 23.1 percent in comparison with the year 1389.

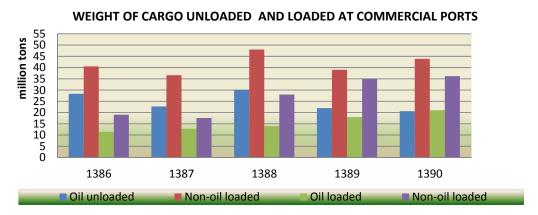

In the year 1390, the cities of Tehran, Esfahan and Arak with 21857, 9631 and 8467 thousand rials had the maximum average price and Yasuj, Kerman and Ilam with 2292, 3693 and 3876 thousand rials had the minimum average price per square meter of the housing unit's floor area transacted in the real estates agencies. Besides, in the same year, the cities of Tehran, Karaj and Qazvin with 119134, 46948 and 41102 rials had the maximum average rental price respectively and Ilam, Yazd, and Shahr-e-Kord with 15689,15958 and 16568 rials had the minimum average rental price per square meter of the housing unit's floor area transacted in the real estate agencies between the landlord and leaseholder.

In the year 1390, the length of railway lines (main tracks, side tracks, industrial tracks), was 12785 kilometers which increased by 1.3 percent in comparison with the preceding year. In the same year, the length of the roads of the country was 79829 kilometers and the length of the rural roads was 150043 kilometers.

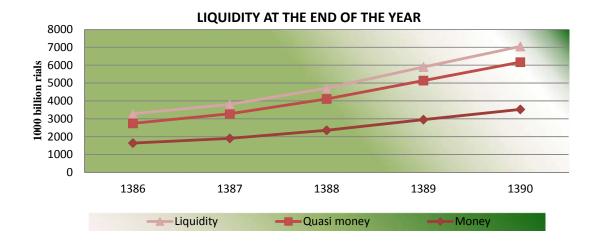

Over the same period, the number of passengers transported via railways was about 28560,000 persons; the number of passengers transported via public road passenger vehicles (bus, minibus, passenger vehicles) was about 236 million persons; and more than 21 million passengers were transported via the airports.

There were more than 612 million intra-city parcels, more than 155 million inter-city parcels, so, 1,356,000 parcels dispatched abroad and 6263000 parcels from abroad during the year 1390. These amounts indicate a fall of 2.8, 7.2 and 4.5 percent and a rise of 10.9 and compared to the previous year respectively. Moreover, the number of fixed telephone lines in use was more than 26 million and 540 thousand, the number of mobile phone subscribers was more than 70 million persons. In the year 1390, a number of 52704 villages were connected to telephone facilities.

In the year 1390, the value of foreign trade transactions amounted to 1044 thousand billion rials, which had an 11 percent increase in comparison with the preceding year. Out of the stated value, 65 and 35 percent were related to the imports and non-oil exports respectively.

During the same year, 38 million tons of different goods with a value of 673 thousand billion rials (equaling 78 billion dollars) entered into the country via customs terminals, showing an increase of 1.2 percent in comparison with the preceding year. It should be noted that the maximum value of imports relates to the UAE (31.9 percent of total value), China (12 percent of total value) and Republic of Korea (7.7 percent of total value). Moreover, in this year, 66 million tons of various kinds of non-oil goods with a value of 371 thousand billion rials (equaling 27 billion dollars) have been exported abroad via customs terminals which rose 35.4 percent in value compared to the preceding year. The maximum value of these exports relates to the countries of China (16.7 percent of total value), Iraq (15.3 percent of total value), and UAE (13.3 percent of total value).

In the year 1390, liquidity (money and quasi money) of banking system was about 3522 thousand billion rials which increased by 19.4% compared to the previous year.

Over the same year, outstanding claims of the banking system on the public sector were about 678 thousand billion rials, showing a rise of 22.4 percent in comparison with the previous year.

Outstanding claims of banks and non-bank credit institutions on non-public sector in the year 1390 were about 3524 thousand billion rials which increased by 20.3%, compared to the previous year.

Non-public sector outstanding deposits with the banking system in the year 1390 were about 3258 thousand billion rials which rose by 19.6%, compared to the previous year.

In the year 1389, premiums received in the insurance market of the country were about 52 thousand billion rials showing an increase of 26.5% compared to the previous year. Moreover, percentage of claims paid to the premiums received was 78.5% which shows a rise of 3% compared to the previous year.

In the year 1390, value of the shares transacted for the eligible companies on Tehran Stock Exchange was about 226 thousand billion rials showing an increase of 3.8% in comparison with the previous year.

National budget resources for the year 1391 were predicted to form an amount of 5666 thousand billion rials, indicating a rise of 11.4 percent in comparison with the previous year.

Government revenues and cession of government capital and financial assets were predicted about 1644 thousand billion rials in 1391, indicating a fall of 3.1 percent in comparison with the previous year. In the year 1391, cession of capital assets with 42.6%, tax revenues with 28%, and revenues from government ownership with 9% account for the highest share of government revenues respectively.

Actual expenditure credits (current) for government agencies in Ostans in the year 1390 were about 43.4 thousand billion rials with a rise of 16.3 percent compared to the previous year. Moreover, Ostans' actual provision-of-capital-assets credits (development) were about 71.6 thousand billion rials in the year 1389 showing a rise of 20.1 percent in comparison with the previous year.

In the year 1389, gross domestic product of the country at market prices was about 625thousand billion rials at constant 1376 prices, showing an increase of 6.3% compared to the year 1388.

During the same year, "manufacturing sector" with 20.26 percent, "wholesale and retail trade and repair of motor vehicles and goods" with 17 percent, "Real estate, renting and business activities" with 4.20 percent and "agriculture, hunting and forestry" with 10.2 percent had the highest share of value added in GDP at constant 1376 prices respectively.

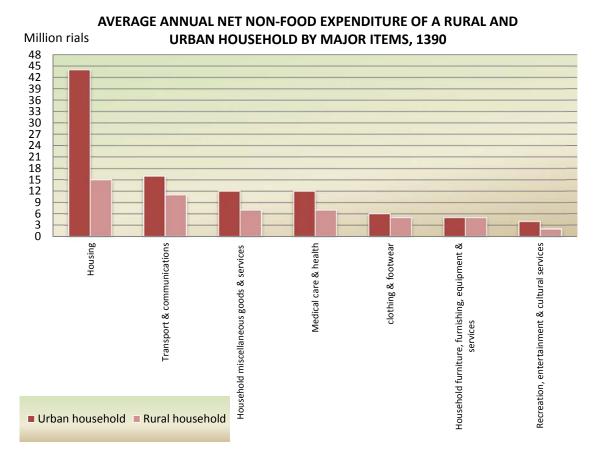

In the regional accounts sector in the year 1389, Ostans of Tehran and Khuzestan with 28.2% and 12.9% had the highest contribution and Ostans of South Khorasan and North Khorasan with 0.51% and 0.65% had the lowest percentages of share of GDP at current prices respectively.

In the year 1390, the average annual net expenditure of an urban household amounted to 132.7 million rials including 100 million rials for non-food expenditures (75.3 percent) and 32.8 million rials (24.7 percent) for food and tobacco which increased by 16.7 percent in comparison with the previous year.

In the year 1390, the average annual income of an urban household was about 130.3 million rials. Out of the income sources, miscellaneous incomes with 55.2 percent were of the highest share.

Also in the year 1390, the average annual income of a rural household amounted to 79.7 million rials. Out of the income sources, self-employment income with 45.4 percent was of the highest share.

Consumer price indices for goods and services in urban areas with an increase of 26.4 percent in the year 1390, compared with the previous year, reached 385.9 (base year = 1381). Compared with the changes in the index of the previous year, this index got an increase of 12.5%. In the year 1390, consumer prices index for goods and services increased by 39.8 and 12 percent for three special groups "goods" and "services" respectively compared with those of 1389.

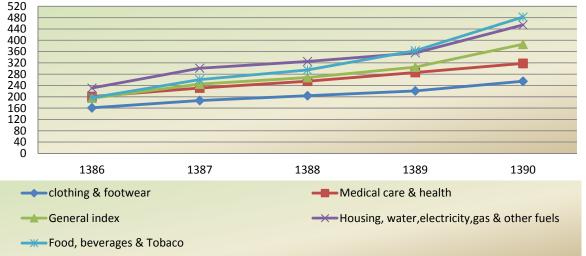

In the year 1390, the highest and lowest general index was for Ostans of Chaharmahal & Bakhtiyari and Khorasan-e-Razavi, namely 525.9 and 336.1 respectively.

Consumer prices index for goods and services in rural areas in the year 1390 increased by 36.5 percent compared to the year 1389 and reached 439.2 (base year=1381). The consumer prices index for goods and services of rural households for two special groups "goods" and "services", in the year 1390, as compared to the year 1389, increased by 43.4 and 13.2 percent respectively.

National producer prices index for the year 1390, compared with that of the year 1389 increased 34.2 percent and reached 283.5 (base year= 1383).

In the year 1390, price index for exported goods increased by 14.2 percent as compared to the year 1389 and reached 234.7 (base year= 1383).

HOUSEHOLD CONSUMER PRICE INDICES FOR SOME GROUPS OF GOODS AND SERVICES IN URBAN AREAS (1381= 100)

Estimation shows that the population of the world in 2100 will be 10124 million. Asia and Africa with 4596 and 3574 million people are the most highly populated areas of the world.

Iran's area was 1628750 square kilometers in 2010 and stands at No. 14 in the rankings.

Russian Federation, Canada, USA, China, Brazil, Argentina and Kazakhstan are the vastest countries in the world, respectively.

In 2008, 2009 and 2010,the Human Development Index (HDI) for the Islamic Republic of Iran were 0.691, 0.697 and 0.702 respectively, which in the year 2008 was ranked 88th among the world's countries.

In 2011, life expectancy at birth in the Islamic Republic of Iran was 72.9 years.

In 2008, primary energy production in the world was equal to 10897 million tons of crude oil. In the same year, total energy consumption in the world was 10020 million tons of crude oil.

According to statistics issued by OPEC, Iran crude oil production in 2011 was 3576 thousand barrels per day. Iran ranks the second among the 12 OPEC oil producing countries. Saudi Arabia with 9311thousand barrels is ranked the first among the world's oil producing countries.

According to the cited statistics, Iran ranks the fourth among the OPEC oil exporting countries. Besides, supplying about 188 billion cubic meters of natural gas to the market, Iran is the largest gas supplier in OPEC.

In 2009, Iran GDP per capita was 4863US dollars, whereas Norway with a GDP per capita of 87674 dollars holds the highest GDP per capita.

From 1358 to 1388, there were ten presidential election rounds in the Islamic Republic of Iran. The percentage of public participation in the tenth presidential election was about 85 percent, showing a 25 percent increase compared to the previous round. The rate of public participation in the ninth round of the Islamic Consultative Assembly election reached 64 percent, showing a 9 percent increase compared to the previous election.
