

21 Household Expenditure & Income

Introduction

The household expenditure and income (household budget) was first studied in the year 1314 by the National Bank of Iran. The main objective of the study was to obtain the consumption coefficients for calculation of living expenditure index.

After a long cease, in the year 1338, Economic Studies Office of the National Bank of Iran collected statistics in this field by interviewing sample households in 23 cities of the country to revise the weight of the living expenditure index. The Central Bank of the I.R. Iran has regularly conducted some studies on the income and expenditure of urban households since the year 1344. Since the year 1347, survey of households expenditure in urban areas, on a larger scale, was initiated by the Statistical Centre of Iran (SCI). In addition, survey of households expenditure in urban areas, on a larger scale, was taken by the SCI in the year 1347. Since the year 1353, the survey has covered both expenditure and income of urban households and continued to date, excluding the years 1355, 1357 and 1360. The results have been processed and published annually.

Survey of rural households expenditure and income was first conducted by the General Department of Public Statistics in the year 1342, and by the establishment of the SCI in the year 1344, the survey continued in a larger scale by the new organization.

Currently, statistics on urban households expenditure and income are released by both the Central Bank and the SCI; however, those on rural households are released by the SCI.

In this chapter, the statistics on average annual food and non-food expenditures of an urban and a rural household have been presented by deciles

of expenditure, size of household and average annual income of the mentioned households by income sources based on the results of the SCI's (sample) surveys. These survey were taken according to the United Nations recommendations (NHSCP¹ and SNA² publications). The sample survey is conducted through visiting sample households in urban and rural areas.

Definitions and concepts

Expenditure: monetary value of goods procured or services provided by the household via purchase, domestic production, against service and free receipts from different organizations, for own consumption or as gift to others.

Gross expenditure: household expenditure without reducing the income from sale of used goods.

Net expenditure: gross expenditure less the income from sale of used goods. Where the value of the sold goods is more than the purchased goods, the result is published as a negative figure.

Household, urban and rural areas: see Chapter 3, Definitions and concepts.

Decile: expenditure of consuming population sorted on the basis of the goods and services charges and then dividing the society into ten equal groups. Each group is called a decile.

Income: all the sums and value of goods received by the household for the job done or capital invested or from other sources (retirement pension, occasional income, etc.) during the enumeration. In this survey, various net incomes are as follows:

¹. National Household Survey Capability Programme, New York.

² System of National Accounts, 1993

Net wage and salary income of public, cooperative and private sectors: income of all the wage and salary earners of the household working in public, cooperative and private sectors after deduction of the tax and retirement allowance..

Agricultural self-employment income: the income of the members of the household as employer or own account worker in agricultural sector after deduction of job on costs. The job on costs covers paid wage and salary, primary material charges, non-durable appliances, amortization, other production charges and job taxes.

Non-agricultural self-employment income: income of the members of the household as employer or own account worker in non-agricultural self-employment sector, after deduction of job on costs.

Miscellaneous income: all sums and goods value the household has received through ways other than its members employment, such as selling of the home-made manufactures, retirement pension, rental of movable and immovable assets, dividend, and charity and social security organization aids.

Selected information

In the year 1394, the average annual net expenditure of an urban household amounted to 262.4 million rials including 200 million rials for non-food expenditures (76.2 percent) and 62.4 million rials (23.8 percent) for food and tobacco which increased by 11.7 percent in comparison to the previous year.

In the year 1394, out of 200 million rials for average annual urban household net non-food expenditure, the highest and lowest share was related to housing expenditures with 88.3 million rials (44.2 percent) and recreation, entertainment and cultural services with 7.5 million rials (3.8 percent), respectively.

Furthermore, in the same year, out of 62.4 million rials for annual urban household net food and tobacco expenditure, the highest and lowest share was related to meat with 13.1 million rials (21 percent) and spices, seasonings and pickles with 2.1 million rials (3.4 percent), respectively.

In the year 1394, average annual rural household net expenditure amounted to 147 million rials including 89.2 million rials for non-food expenditures (60.7 percent) and 57.8 million rials (39.3 percent) for food and tobacco which increased by 6.1 percent in comparison to the previous year.

In the year 1394, out of 89.2 million rials for average net non-food expenditure of a rural household, housing expenditure with 26.4 million rials (29.6 percent) and recreation, entertainment and cultural services with 2.7 million rials (3 percent) accounted for the highest and lowest proportion of expenditure, respectively. Moreover, out of 57.8 million rials average net food and tobacco expenditure of a rural household, flour of cereals; macaroni and similar products with 15 million rials (26 percent) and spices, seasonings and pickles with 2 million rials (3.4 percent) had the highest and the lowest shares among the expenditure items, respectively.

In the year 1394, the average annual income of an urban household was about 278.9 million rials. Out of the income sources, miscellaneous incomes with 140.2 million rials (50.3 percent) were of the highest share.

Also in the year 1394, the average annual income of a rural household amounted to 161 million rials. Out of the income sources, miscellaneous incomes with 62.6 million rials (38.9 percent) was of the highest share.
