## IN THE NAME OF ALLAH THE COMPASSIONATE, THE MERCIFUL

### **Preface**

The Statistical Yearbook of Iran contains the latest statistical information available on economic, social, cultural and political areas of the country to meet the statistical data needs of the local decision makers, planners and researchers, as well as all other interested users. The Yearbook has been released regularly since the year 1345.

The major sources of the Yearbook include: (a) the results of censuses and sample surveys conducted by the Statistical Centre of Iran (SCI), (b) the results of surveys conducted by other government organizations, and (c) administrative registers. Since population and housing census and also some other censuses and surveys conducted by the SCI or other organizations are not taken at regular intervals, some of the Yearbook's statistical items are not available annually and continuously.

In order to make timely provision of important statistical information to meet the needs of users and reduces their references to various organizations producing statistics, the SCI has attempted to have timely release of different statistical publications including the Statistical Yearbook, and also developed the Statistical Information Database.

The 1395 Statistical Yearbook of Iran is published in both Persian and English of which the CD-ROM is also available. Moreover its electronic version is accessible on <a href="https://www.amar.org.ir/english/Iran-Statistical-Yearbook">https://www.amar.org.ir/english/Iran-Statistical-Yearbook</a>.

. In addition, the Persian version of the statistical yearbooks of 31 Ostans (provinces) are released by the Management and Planning Organization of the Ostans nationwide with similar format under the supervision of the SCI.

Before going through the chapters, users are recommended to study the introductions which take in the definitions and concepts concerned and the subject-matter coverage of the statistical items. Further, they provide readers with justifications for unavailability of some timely data or exclusion of some statistical items.

It is noteworthy that the beginning of the yearbook includes selected information of all chapters which has been added to the introduction of the related chapter, too. In order to have a general view on all information presented in the Yearbook, its reading is recommended.

Particular thanks and appreciation are extended to all the *Director-Generals of Statistics and Information Offices* of the ministries, organizations and the Islamic Revolution Institutions as well as all their colleagues who helped us in this great job. Their generous and valuable assistance contributed a lot to preparation of the Yearbook. We hope to enjoy their cooperation and contribution continuously for enhancing the yearbook quantitatively and qualitatively.

Special thanks go to my colleagues in the Statistical Centre of Iran who contributed to the preparation and production of this publication.

Omid Ali Parsa Head, Statistical Centre of Iran

### **Selected information**

ran comprises a land area of over 1.6 million square kilometers. It lies on the southern half of the northern temperate zone, between latitudes 25° 4' and 39° 46' north, and longitudes 44° 2' and 63° 19' east. The land's average height is over 1200 meters. The lowest place, located in Chaleh-ye-Loot is only 56 meters high, while the highest point, Damavand peak in Alborz Mountains, rises as high as 5610 meters. The land height at the southern coastal strip of the Caspian Sea is 28 meters lower than the open seas.

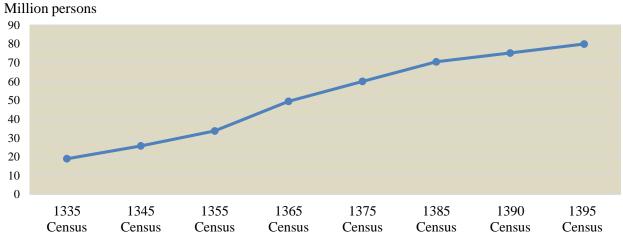

Iran is bounded by Turkmenistan, Caspian Sea, Azerbaijan, and Armenia on the north, Afghanistan and Pakistan on the east, Oman Sea and Persian Gulf on the south, and Iraq and Turkey on the west.

In the year 1395, I.R. Iran was divided into 31 Ostans (provinces), 429 Shahrestans (subprovinces), 1058 Bakhshes (counties), 1246 Shahrs (cities) and 2589 Dehestans (rural agglomerations).

On the basis of the Population and Housing Census taken in the month of Aban, 1395, the total population of the country was 79926270 persons (comprising 50.7% male & 49.3% female); compared to the result of the Census in the year 1390, the average annual population growth was 1.2%. In the 1395 Census, there were 24.2 million households out of whom about 74.9% were settled in urban areas and the rest (25.1%) was settled in the rural areas. In the mentioned year, the mean age for men and women was 31.1.

In the year 1395, about 1.5 million births were registered out of which 48.6 percent were female. Moreover, about 673,000 marriages and about 181 thousand divorces were recorded over the year 1395, showing a increase of about 10.6% and an increase of below 0.1%, respectively in comparison with the preceding year.

#### **COUNTRY'S POPULATION**

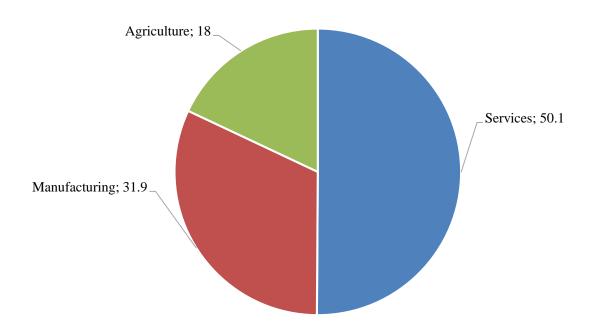

In the year 1395, based on the Labor Force Survey, about 39.4% of population aged 10 and over were considered economically active, with an unemployment rate of 12.4%. Unemployment rates for male, female, in urban and rural areas were 10.5, 20.7, 13.7, and 8.9 percent, respectively.

Besides, unemployment rate of active population aged 15-24 and 15-29 was 29.2 and 25.9 percent, respectively.

In the mentioned year, amongst Ostans of the country, Kermanshah, Chaharmahal & Bakhtiyari and Ardebil with 22.0, 20.2 and 15.3 percent had the highest unemployment rate and Markazi, Semnan and Hamedan with 7.3, 8.6 and 9.5 percent had the lowest unemployment rate of the country, respectively.

# RELATIVE DISTRIBUTION OF EMPLOYED POPULATION AGED 10 AND OVER BY THREE MAJOR ECONOMIC ACTIVITIES, THE YEAR 1395

In the year 1395, the area zones protected by the Iran Department of Environment was 17298265 hectares of which the Ostans of Kerman with 2405944 hectares and Qazvin with 25454 hectares had the highest and lowest areas, respectively.

In the same year, the number of conflagration in forests and ranges was 2298 which rose about 10.1 percent in comparison with the previous year.

In the year 1395, the average volume of collected wastewater was 4401032 cu m which shows a 3.7 percent rise compared to the previous year. The Ostans of Tehran and Khuzestan had the highest share of collected wastewater with 18.2 percent and 13.2 percent, respectively and the Ostans of Semnan and South Khorasan with 0.2 percent and 0.3 percent of total nation's wastewater had the lowest volumes, respectively.

In the year 1394, among the pollutant and greenhouse gases resulted from the burning of fuels by the transportation sector, CO2 with 148460232 tons (93.0 percent) had the highest share. It is noteworthy that most of the CO2 was resulted from the burning of gasoline and the lowest one goes to the burning of liquefied gas.

In the year 1395, about 47 percent of the population of the country were under the coverage of the network for collection and transmission services of urban sewage which rose by 3 percent compared to the previous year. The highest and lowest shares of the population under the coverage

of this network belong to the Ostans of Kordestan with 92 percent of the total population of the Ostan and Kerman with 11 percent, respectively.

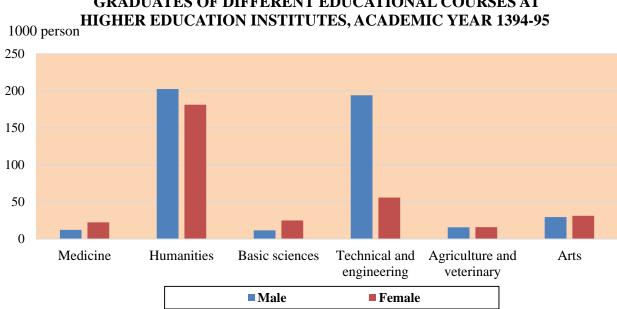

In the year 1395, 90.3 percent of hospitals enjoyed an appropriate solid waste management system moreover; 77.6 percent of hospitals had an appropriate sewage management system showing a 6.3 and 3.3 percent increase in comparison with the previous year, respectively.

During the academic year 1395-1396, over 7 million and 648 thousand persons were studying in primary schools, over 3 million 130 thousand persons were in lower secondary schools and over 2 million 530 thousand persons were in upper secondary schools.

Total number of university students over the academic year 1395-1396 was more than 4 million 73 thousand persons, indicating a decrease of 6.3 percent compared to the previous year.

Out of the total number of the students, 18.4% were studying for associate's degree, 57.3% for bachelor's degree, 18.8% for master's degree and 5.5% for professional and specialty doctorate.

Total number of universities and higher education institutes graduates during the academic year 1394-1395 was about 798,000 persons, showing a 7 percent decrease compared to the previous year.

GRADUATES OF DIFFERENT EDUCATIONAL COURSES AT

In the year 1395, over 46,000 physicians were employed in the Ministry of Health and Medical Education. Out of the cited number, 15868, 4145, 374, 2016, 17452, 2467 and 4530 persons were general practitioners, dentists, PhD in medical laboratory science, pharmacists, specialists, and sub-specialists, and professional PhD, respectively. Also in the same year close to 262000 paramedics were working in the nation's medicine universities out of whom 83355 people were professional nurses (holding bachelor's or higher degree), 480 persons were practical nurses (holding associate's degree), 6271 persons were operating room technicians, 5146 persons were anesthetist associate or technicians, 11657 people were health workers, 30868 people were health attendants, 23753 persons were midwives, and 101315 persons were other paramedics.

In the year 1395, there were 954 operating hospitals with 157303 fixed beds out of which 763 hospitals were affiliated to the government sector and 191 hospitals were for private sector. In the year 1395, there were a number of 5517 health care and medical centres, 4198 health stations, 299 maternity facilities, 17854 operating health houses, 6625 medical diagnostic laboratories, 7449 rehabilitation centres and 3246 diagnostic nuclear treatment institutions in the country.

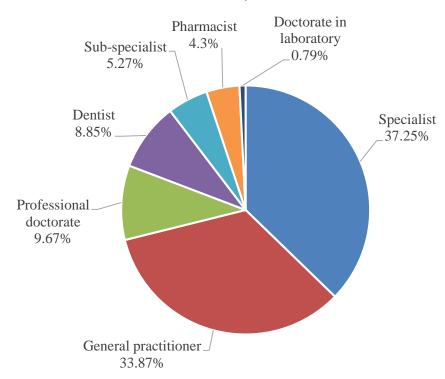

In the year 1395, a number of 10937 pharmacies in the country out of which more than 12 percent are 24-hour pharmacies.

In this year, there were 2270 stations for Emergency Medical Services (EMS) out of which 828 stations (36%) were in urban areas and 1442 stations (64 %) in rural areas.

In the year 1395, 2665717 blood donators visited the blood centres, and 2127064 blood bags were donated totally.

In the year 1395, there were a number of 1799 veterinary pharmacies, 1106 vaccination centres for livestock and 921 veterinary clinics, 68 livestock hospitals and 279 veterinary laboratories in the country.

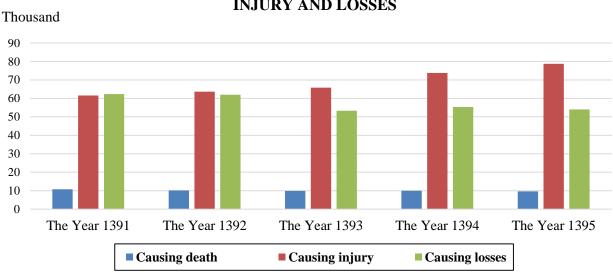

# DISTRIBUTION OF PHYSICIANS EMPLOYED IN THE MINISTRY OF HEALTH AND MEDICAL EDUCATIONBY FIELD OF SPECIALITY, THE YEAR 1395

In the year 1395, a number of 2893, 634 and 274 branches were in operation in general courts, courts of appeal and revolutionary courts which shows 4.4 and 3.8 percent increase and an 11.9 percent decrease, respectively, in comparison to the preceding year.

In the year 1395, 76782 and 5002 robberies from private and government buildings were registered by the Police Department of the I.R of Iran which increased by 0.1 and 10.7 percent, respectively in comparison to the preceding year. Moreover, over in the same year, robbery from houses with 84827, shops with 21379, car theft with 74959 and motorbike theft with 70075 cases were registered by the Police Department which decreased by 3.5%, 5.6%, 2.3% and 10.3%, respectively in comparison to the preceding year.

In the year 1395, the number of the intra-city car accidents with a 3.7% increase in comparison to the previous year reached more than 327,000 cases, out of which 1.2% were for accidents causing death, 61.4% for casualty and 37.4% for losses. Also the percentage of the inter-city accidents with a 2.4% increase in comparison to the previous year reached more than 142,000 cases, out of which 6.8% of accidents resulted in death, 55.3% in casualty and 38% in losses.

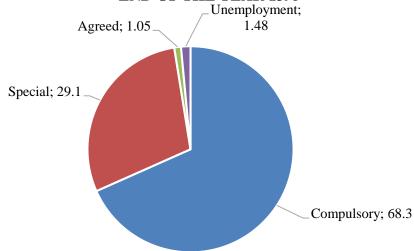

INTER- CITY MOTOR VEHICLE ACCIDENTS CAUSING DEATH, INJURY AND LOSSES

According to the results of the 1390 Population and Housing Census, about one million and 18 thousand persons have at least one type of disability, of whom 62.6% accounted for male. It should be mentioned that about 81 percent of the disabled persons have one type of disability only.

At the end of the year 1395, the number of establishments covered by the Social Security Organization was more than one million 192 thousand, and the number of principal insured persons covered by the mentioned Organization increased to over 13 million 779 thousand persons, showing a rise of 4.9% compared to the previous year.

In the year 1395, beneficiaries (principals and dependents) of medical services covered by Iran Health Insurance Organization were about 38.19 million persons, of whom 14.82%, 23.1%, 0.04%, 58.5% and 3.7% enjoyed government employees insurance, public health insurance, Iranian insurance, villagers insurance and the insurance of other groups, respectively.

# THE PRINCIPAL INSURED PERSONS COVERED BY THE SOCIAL SECURITY ORGANIZATION BY TYPE OF INSURANCE AT THE END OF THE YEAR 1395

In the year 1395, the highest and lowest programs produced by national radio channels of the I.R.I.B were on Islamic knowledge with over 50,000 hours and historical with over 7,000 hours. Also in the same year, the highest and lowest programs produced by TV channels of the I.R.I.B were on social and historical subjects with over 23,000 and 811 hours, respectively.

In the year 1395, the number of attendances in 415 operating cinemas was more than 25,000,000 persons that increased by 83.7 percent compared to the previous year.

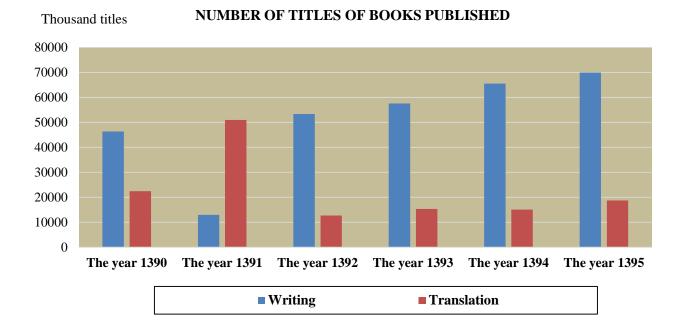

During the same period, the number of titles of the press and periodicals published in Tehran and other cities of the country was 3000 and 3049 which decreased by 29.4% and 24.5%, respectively in comparison with the preceding year. Moreover, 294 titles of the said press and periodicals were published daily while 1088 titles were published weekly.

In the year 1395, there were 3346 public libraries affiliated to the Ministry of Culture and Islamic Guidance which increased 2.1 percent compared to the year 1394.

Over the same period, more than 88000 titles of books with a circulation of about 144000 copies, authorized by the Ministry of Culture and Islamic Guidance, were printed and published which increased by 9.9% and decreased by 6.4%, respectively compared to the previous year.

During the year 1395, Sa'dabad Palace was the most visited museum in the nation, which 31.21 percent of museums visitors were for that museum. Also, Shiraz Hafeziyeh mausoleum was the most visited place with 12.56 percent of the total visitors to the historical monuments. Furthermore, in the year 1395, the number of foreign tourists arrived in the country was more than 4 million 911 thousand persons indicating a decrease of 5.2 percent in comparison with the year 1394.

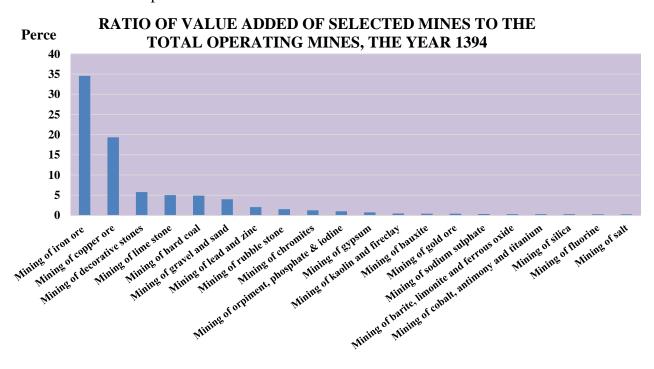

In the year 1395, there were no pilgrims under the name of major or minor Hajj (Mecca pilgrims), but the pilgrims of holy places were about 731 thousand persons.

In the year 1394, there were 5214 operating mines in the country with a total of 91211 workers which decreased by 0.7 percent compared to the year 1393.

In the same year, the value of the mines' production amounted to 118291069 million rials. Amongst different activities, iron ore, copper ore, and decorative stones, with 52343356, 25791222, and 7522039 million rials had the highest annual production values, respectively.

In the year 1394, the value added of the activities of the operating mines amounted to 84071447 million rials out of which the highest amount was for iron ore, copper ore, and decorative stone, with 34569405, 19353501 and 5793354 million rials, respectively. The total value added obtained from these mines comprises about 71% of the total value added of this sector.

In the year 1395, a total of 777714 thousand barrels of crude oil were exported, which increased by 48.6% compared to the preceding year. Also in the same year, the amount of oil products exports was 23 million liters per day which decrease by 17.9% compared to the preceding year.

Furthermore, in the mentioned year, the production of some oil products in the total national refineries by cubic meter per day was: liquefied gas: 9068, motor spirit: 62177, burning oil: 20710, and oil gas: 80339 and fuel oil: 69942 which changed -10.5, -8.4, -8.3 and -3.3 percent compared to the preceding year.

In the year 1395, oil gas with the annual consumption of 28131 thousand cubic meters had the maximum share of consumption among all kinds of oil products followed by motor spirit with the annual consumption of 25762 thousand cubic meters.

Over the year 1395, 1085 cities were supplied with piped gas and 25 cities were being supplied with piped gas.

The total production of the National Company of the Petrochemical Industries with a 9.1% increase compared to the preceding year reached 50624 thousand tons in the year 1395.

# Million litres 3500 2500 2000 1500 The year 1391 The year 1392 The year 1393 The year 1394 The year 1395

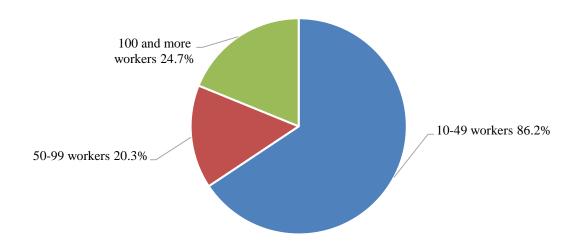

### IMPORTED VOLUME OF MOTOR SPIRIT

In the year 1394, there were 13123 manufacturing establishments with 10 and more workers with 1258414 employees, which declined by 9.2 and 3.9 percent, respectively compared to the preceding year. 97.4 percent of the mentioned establishments are owned by private sectors and about 2.6 percent by public sector. Besides, from among the said number of workers, about 15.6 percent were employed in the establishments with 10-49 workers, 11.1 percent in the establishments with 50-99 workers and 73.3 percent were employees of the establishments with 100 and more workers.

In the year 1394, the value-added of the activity of manufacturing establishments with 10 and more workers was over 1176.3 thousand billion rials which decreased by 11.7 compared to the preceding year.

In the year 1394, Bushehr, Khuzestan and Hormozgan provinces with 1210699, 402108 and 251174 million rials, respectively had the highest productivity for manufacturing establishments with 10 and more workers and Bushehr, Hormozgan and Khuzestan with 5891, 2045 and 1694 million rials had the highest productivity for the workers of manufacturing establishments with 10 and more workers.

# DISTRIBUTION OF NATIONAL MANUFACTURING ESTABLISHMENTS WITH 10 AND MORE WORKERS BY SIZE, THE YEAR 1394

In aquatic year 1394-1395, the amount of annual discharge of the underground water resources was about 61262 million cubic meters which increased by 0.2% in comparison with the aquatic year 1393-94.

In the year 1395, the inflow of the large reservoir dams was 40695 million cubic meters which increased by 12.6% in comparison with the previous year. In this year, 30301 million cubic meters of large reservoir dams water was consumed, 65.0% percent of which belonged to the agricultural consumptions.

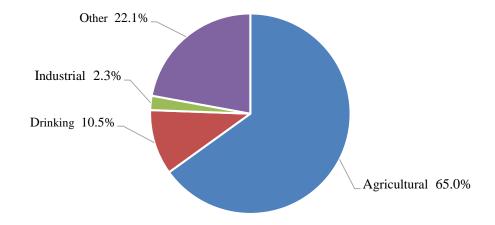

In the year 1395, there were more than 21220000 water extensions (urban and rural), which had a 2.4 percent increase in comparison with the preceding year. Out of this number, about 15827000 extensions were for urban areas which had a 2.5% increase compared to the previous year.

In the year 1395, the gross electricity generation of institutions affiliated to the Ministry of Energy was about 128291 million kilowatt-hours, about 47.4 percent of which was produced in the steam power plants. Furthermore, the gross electricity generation of the installed generators had a 3.0 percent increase compared to the preceding year.

In the year 1395, percentage of electricity subscribers to house, public, agricultural and manufacturing sectors was 80.9 %, 4.6%, 1.2%, and 0.7 %, respectively. Also in this year, the percentage of the electricity sold and consumed in house, manufacturing, agricultural and public sectors and for the streets lightning was 33.0%, 32.7%, 15.3%, 9.7%, and 2.0%, respectively.

At the end of the year1395, a number of 56793 villages (about 4.5 million rural households) were electrified which increased by 1.1% in comparison with the previous year.

### WATER CONSUMPTION OF LARGE RESERVOIR DAMS BY TYPE OF USE, THE YEAR 1395

In the year 1395, close to 118 thousand construction permits with 62271 thousand square meters floor area were issued by municipalities which decreased by 1.26% and 0.14%, respectively in comparison with the preceding year. It is noteworthy that over 84 percent of the permits issued were related to the housing units.

In the year 1395, the value of investments made in urban areas by private sector for the newly started, semi-finished and completed buildings was about 602229 billion rials which decreased by 14.14 percent in comparison with the year 1394.
