Preface

The Statistical Yearbook of Iran contains the latest statistical information available on economic, social, cultural and political areas of the country to meet the statistical data needs of the local decision makers, planners and researchers, as well as all other interested users. The Yearbook has been released regularly since the year 1345.

The major sources of the Yearbook include: (a) the results of censuses and sample surveys conducted by the Statistical Centre of Iran (SCI), (b) the results of surveys conducted by other government organizations, and (c) administrative registers. Since population and housing census and also some other censuses and surveys conducted by the SCI or other organizations are not taken at regular intervals, some of the Yearbook's statistical items are not available annually and continuously.

In order to make timely provision of important statistical information to meet the needs of users and reduces their references to various organizations producing statistics, the SCI has attempted to have timely release of different statistical publications including the Statistical Yearbook, and also developed the Statistical Information Database.

The 1395 Statistical Yearbook of Iran is published in both Persian and English of which the CD-ROM is also available. Moreover its electronic version is accessible on <https://www.amar.org.ir/english/Iran-Statistical-Yearbook..>

. In addition, the Persian version of the statistical yearbooks of 31 Ostans (provinces) are released by the Management and Planning Organization of the Ostans nationwide with similar format under the supervision of the SCI.

Before going through the chapters, users are recommended to study the introductions which take in the definitions and concepts concerned and the subject-matter coverage of the statistical items. Further, they provide readers with justifications for unavailability of some timely data or exclusion of some statistical items.

It is noteworthy that the beginning of the yearbook includes selected information of all chapters which has been added to the introduction of the related chapter, too. In order to have a general view on all information presented in the Yearbook, its reading is recommended.

Particular thanks and appreciation are extended to all the *Director-Generals of Statistics and Information Offices* of the ministries, organizations and the Islamic Revolution Institutions as well as all their colleagues who helped us in this great job. Their generous and valuable assistance contributed a lot to preparation of the Yearbook. We hope to enjoy their cooperation and contribution continuously for enhancing the yearbook quantitatively and qualitatively.

Special thanks go to my colleagues in the Statistical Centre of Iran who contributed to the preparation and production of this publication.
