INDEX

Index titles (keywords) are selected from the tables of the statistical yearbook and are arranged alphabetically. In cases where it is necessary to provide subdivisions of some headings, the mentioned subdivisions are listed alphabetically and the distance from the line is observed under the relevant headings. The numbers listed in front of each index title or subdivision represent the number of Yearbook tables. The left-hand number of each number indicates the chapter number and the right-hand number indicates the table number within the relevant chapter. It should be noted that the dashed line between the two table numbers means that the keyword in question in the table or tables is also between the two table numbers.
